
WHITE PAPER: CONTINENTAL PROTOCOL (\$WICK)

Underworld currency.

1. Overview

\$WICK is the native asset of the CONTINENTAL—an encrypted, access-driven network built on Solana. It's not a meme or hype play. It's digital infrastructure designed for operators demanding speed, discretion, and real control.

2. Purpose

To create a utility token that enables secure access, private execution, and decentralized influence. No noise. Real-world use.

3. Why Solana

Solana delivers unmatched performance critical for the CONTINENTAL:

- 65,000+ transactions per second
- Sub-second finality
- Minimal transaction costs

Speed and scale without compromise.

4. Utility

Access Control

\$WICK is the key to the CONTINENTAL. Without it, there is no entry.

Private Transactions

Peer-to-peer trades, off-chain logic, on-chain settlement. Built for privacy and speed.

Encrypted Contracts

Black-label smart contracts that are custom, private, and self-enforcing.

Reputation & Influence

Stake \$WICK to build weight within the ecosystem. Influence and privileges are earned.

5. The CONTINENTAL

A private, decentralized network providing:

- Token-gated DApps
- Peer-to-peer deal zones
- Encrypted contract deployment
- Secure digital vaults

Not public, but trusted infrastructure for serious operators.

6. Tokenomics

Category	Allocation	Purpose
The High Table	50%	Reserved by the Founder for strategic control, syndicate expansion, and protocol enforcement.
DEX Liquidity	25%	AMM pools and listings for rapid, permissionless access.

Treasury Reserve	15%	Operational buffer, legal, and high-priority strategic reserves.
Airdrop/Rewards	10%	Syndicate growth, missions, and loyalty distribution.

Total Supply: 100,000,000 \$WICK

7. Governance

No committees. No politics.

Governance is direct and reputation-weighted. Stake your \$WICK, earn influence, and vote on critical protocol decisions.

8. Roadmap

Phase I – Launch

- Token deployment
- Liquidity pool setup
- CONTINENTAL Access Alpha
- Smart contract suite

Phase II – Expansion

- DApp onboarding
- Reputation layer activation
- DAO ignition
- First encrypted contract launches

Phase III – Global Syndicate

- Real-world utility integration
 - Private syndicate funding
 - Exclusive merch and events
 - Optional cross-chain operability
-

9. Final Word

This is not a game or a trend.

\$WICK is the digital asset of the CONTINENTAL—a network built for operators who demand speed, discretion, and control.

If you're here to chase hype, look elsewhere.

If you move with purpose and execute in silence—

Welcome to the CONTINENTAL.
